ORGANISATIONAL SKILLS

● Organisational skills

Thanks to the experience gained in years of work on different types of digital product I'm able to follow the design from the preliminary stages up to publication. Both in terms of technology and time / budget.

I know and, depending on the project, I apply the Agile design methodologies.

I worked in national and international development teams remotely with shared code and version control (Git).

COMMUNICATION AND INTERPERSONAL SKILLS

● Communication and interpersonal skills

My work puts me every day in front of the need to interact with different actors, each characterized by its specialized language.

From the commercial relationship with customers to the needs of communication agencies, from the definition of technical specifications for audio / video services to classroom teaching, my approach to interpersonal communication is strongly based on flexibility.

JOB-RELATED SKILLS

● Job-related skills

UI/UX

I design and realize user experiences, tailored in detail to simplify the use of digital products as much as possible, without renouncing the complexity and the professional stimulus that an unexplored and innovative UX solution can pose.
